

# QF-21A DIAPHRAGM VALVE

200111047

## Features

- Automated testing process under ISO9001 ensures quality.
- High leak integrity performance through 100% tests.
- Diaphragms ensure that the gas will not come into contact with the valve operating mechanism.
- Safety relief device is equipped for relieving gas while there is excessive pressure. Temperature relief is also available.
- Positive operation can be achieved by mechanical link of the upper and lower spindle.
- Quick and easy operation due to ergonomic design.

<b>Inlet Thread</b>	PZ19.2
<b>Outlet Thread</b>	W21.8-14
<b>Dip Tube Thread</b>	M8
<b>Working Pressure</b>	15MPa
<b>Gas Type</b>	O <sub>2</sub> , Calibration gas
<b>DN</b>	2
<b>Approval</b>	TSG
