

ZX-2S-18 VALVE WITH RPV

200111057

Features

- Residual pressure guaranteed to ensure the inside gas purity and cleanliness.
- Automated testing process under ISO9001 ensures quality.
- High leak integrity performance through 100% tests.
- Positive operation can be achieved by mechanical link of the upper and lower spindle.
- Safety relief device is equipped for relieving gas while there is excessive pressure.
- Quick and easy operation due to ergonomic design.
- Heavy-duty forged brass body for durability and high pressure.

Inlet Thread	17E
Outlet Thread	W21.8-14
Dip Tube Thread	M10X1
Working Pressure	167bar
Safety Device	225-250bar
Gas Type	CO2
DN	4
Approval	TPED
